

SARATH KRISHNAN U

B.Tech, Computer Science and Engineering - Artificial Intelligence and Machine Learning

Education

SRM IST-Kattankulathur B.Tech · Computer Science and Engineering - Artificial Intelligence and Machine Learning	2026 CGPA - 8.2/10
Greets Public School Class XII - CBSE · Computer Science · Kaloor,Ernakulam	2022 Percentage - 78%
St Joseph Public School Class X - ICSE · Pattanakad,Cherthala	2020 Percentage - 91%

Projects

EEG-Based Emotion Recognition using CNN SRM Institute of Science and Technology (Final Year Project) · Python, TensorFlow/Keras, NumPy, Pandas, SciPy	Jan 2026 - Mar 2026 Deep Learning
- Developed an EEG-based emotion recognition system using a Convolutional Neural Network (CNN) trained on the SEED dataset to classify three emotional states from multi-channel brain signals. - Performed EEG preprocessing and feature extraction, including noise filtering and normalization, to prepare the signals for deep learning. - Achieved ~90% average accuracy across 15 subjects, demonstrating effective spatial feature learning for emotion classification.	
Sports Injury Prediction: Athlete Health and Performance University Research Project (Guide) · Python,Pandas, Numpy, Matplotlib, Seaborn	Jan 2025 - Apr 2025 Machine Learning
Sports injuries remain a significant concern, affecting athlete performance, team dynamics, and long-term careers. This research proposes an AI-driven system for predicting sports injuries. - Built and evaluated machine learning models achieving ~82–85% prediction accuracy in identifying potential sports injury risks from historical athlete data.	
Eco Tracker (Full Stack Project) Sustainability Tech · React Native, JavaScript, Firebase, MongoDB	Feb 2025 - Present Green Technology
EcoTracker is a React Native-based mobile application designed to help users track, analyze, and reduce their carbon footprint. Applied Agile SDLC methodology while developing Eco Tracker app in a team hackathon.	

Skills

Programming Languages: Python, Java
Tools and Technologies: MySQL, Mongo DB, PowerBI
Languages and Frameworks: Pandas, Numpy, Scikit-learn, Flask
Areas of Interest: Back End, Machine Learning & Deep Learning, Artificial Intelligence, Data Science
Technical Skills: Problem Solving, Data Preprocessing, Communication Skills, Team Player, SDLC
Design and Simulation Tools: Matplotlib, MATLAB, Seaborn

Experience

1Stop Industrial Program on Data Science · Intern	Jun 2024 - Aug 2024
- Developed models for Sleep Stage Classification, SMS Spam Classification, and Credit EDA - Implemented Machine Learning algorithms for text classification and exploratory data analysis. - Utilized Python, Scikit-learn, Pandas, and NLP techniques to boost model performance.

Certifications

Image Processing Onramp
MATLAB

Deep Learning Onramp
MATLAB

Machine Learning Onramp
MATLAB

AWS Academy Graduate - AWS Academy Machine Learning Foundations
Amazon Web Services

Networking Basics
CISCO

Oct 2024

Volunteering

Directorate of Student Affairs
Committee Head · Discipline

- Oversaw **event conduct** and **managed campus operations**.

Animal Rescue Kochi
Community Connect · Animal Welfare

- Volunteered in animal rescue initiatives by assisting in **coordination**, care, and community outreach activities.

Jun 2024 - Jul 2024

Competitions

Digithon 2.0
Final Round · CINTEL DEPT. SRM

Special Appraise for **Individual Pitching skills**.

SRM HACKATHON 8.0
Participation · SRM

Feb 2025
